SUMMARY

Passionate about building end-to-end software solutions with a strong foundation in Android development with practical experience in backend systems and DevOps. Skilled in Kotlin, Jetpack Compose, and Spring Boot, with hands-on experience in cloud infrastructure, CI/CD, and automation for scalable, maintainable applications.

SKILLS

- **Android Development:** Kotlin, Jetpack Compose, MVVM, Clean Architecture, REST APIs (Retrofit)
- **Programming:** Kotlin, Java
- **Backend Development:** Spring Boot, Firebase, MySQL, MongoDB
- **Cloud & DevOps:** AWS, Docker, Kubernetes, Terraform, Helm, GitHub Actions, DevSecOps practices
- **Version Control:** Git, GitHub
- **Data Structures and Algorithms:** Java

PROJECTS

OrbitX - Social Media Application | Android Training Project at Ingenious Tech World

[Github Repo](#)

June 2024 - August 2024

- Collaborated with a team of five to develop a social media platform with features like image uploads, personalized feeds, user search, and real-time messaging.
- Integrated Firebase Firestore for fetching and displaying real-time user posts in the feed.
- Used Firebase Storage for uploading and retrieving media linked to user posts.
- Implemented Firebase Authentication for secure email login and account management.
- Developed the app using Jetpack Compose for UI, Kotlin for app logic, and Firebase for authentication, messaging, and storage.
- Architecture used: MVVM

Note API - Backend Service

May 2025 - June 2025

[Github Repo](#)

- Built a Note API backend using Spring Boot, focusing on core RESTful service development.
- Defined handler methods using Spring MVC annotations like `@RestController`, `@GetMapping`, and `@PostMapping` to define request-response handling.
- Gained hands-on experience in backend fundamentals including routing, request handling, and basic API layering (controller, model, repository).
- Integrated JWT-based authentication and role-based access control using Spring Security.
- Tech Stack: Spring Boot, Spring Security, JWT, MongoDB

Cloud Infrastructure & DevSecOps Automation: [Project Doc](#)

June 2025 - July 2025

CI/CD Pipeline with Terraform & AWS

- Built a complete CI/CD pipeline using Terraform modules to provision AWS infrastructure (VPC, EC2, IAM, S3, CodeBuild, CodePipeline).
- Defined `buildspec.yml` for automated build and deployment of a React app to EC2 via SSM.
- Modularized infrastructure into reusable components for clean, maintainable Infrastructure as Code (IaC).

DevSecOps Pipeline with GitHub Actions, Trivy & EKS

- Designed a secure GitHub Actions workflow for CI/CD, including vulnerability scanning using Trivy.
- Automated Docker image build and deployment to Amazon ECR.
- Deployed application to Amazon EKS with sealed secrets and Kubernetes config management.
- Configured GitHub encrypted secrets for secure integration with AWS and Kubernetes clusters.

DevOps and Cloud Tools: Terraform, AWS (EC2, S3, IAM, CodePipeline, CodeBuild, ECR, EKS), GitHub Actions, Docker, Kubernetes, Trivy, Kubeseal

App-retrofit: Ecommerce Application

June 2024 - August 2024

[Github Repo](#)

- An Ecommerce application built with Kotlin and Jetpack Compose, following the MVVM architecture.
- The app integrates Retrofit to fetch and display product data from the products endpoint of fakestoreapi, ensuring seamless API interaction and efficient data rendering.
- Frontend: Jetpack Compose
- Backend Integration: Retrofit

CERTIFICATIONS

- **Android Industrial Training Certification:** [Certificate](#)
- **DevOps Industrial Training Certification:** [Certificate](#)

EDUCATION

BTech: Computer Science and Engineering

Silicon University, Bhubaneswar, Odisha | **CGPA: 9.01**

High School: LakshmiPat Singhania Public School, Jaykaypur, Rayagada, Odisha

12th Science (2021) : 95.8%

10th Grade (CBSE): 97%
